Coursera, 2024

JUAN PABLO GARCÍA HERNÁNDEZ

Software Engineer | Full Stack Developer

Software Development and Management Engineering student with experience building web applications, integrating APIs, and working with databases. Focused on Full Stack development, problem-solving, and building functional and scalable solutions. Eager to learn new technologies and grow professionally as a software developer.

PROFESSIONAL EXPERIENCE

Instaxia — AI-Powered WhatsApp Chatbot

Junior Frontend Developer / Associate | July 2025 – Present

Developed user interfaces for an AI-powered customer service platform integrated with WhatsApp. Built UI components using HTML, Tailwind CSS, DaisyUI, and ERB templates, and integrated backend APIs for automated responses, company information, and pricing queries.

Centro Automotriz El Rosario S.A. de C.V.

Software Developer — Internship Project | 2025

Developed a web-based system to centralize vehicle inspection reports, including data registration, editing and querying, management reporting, role-based access, and CRUD operations using JavaScript and MySQL.

FEATURED PROJECTS

VOLTS

2026

Full Stack + IoT | Academic Project

Full Stack and IoT ecosystem integrating hardware, mobile applications, cloud services, and enterprise software into a unified solution. Focused on communication and integration across multiple software and hardware components.

CasaLeón

2026

ERP + E-Commerce | Academic Project

ERP and e-commerce system for a leather goods manufacturer, integrating production, inventory, raw materials, purchasing, sales, point of sale, users, roles, and auditing. Designed with a scalable architecture connecting internal business processes with the online store.
